11. (Currently Amended) A method of configuring multiple mobile devices, the method comprising:

selecting separate configuration files to associate  
with each of a plurality ofan installation items;  
accessing eachthe configuration file to identify ~~at~~  
~~least one~~ parameter values that should be acquired  
from a user;  
acquiring the ~~at least one~~ parameter values from thea  
user;  
storing the acquired ~~at least one~~ parameter values as  
part of the installation items;

creating a deployment package by compressing the plurality of ~~comprising the~~ installation items; transferring the deployment package to a plurality of mobile devices; and extracting the parameter values from the deployment package on each mobile device and storing the parameter values in the memory of each mobile device.

12. (Original) The method of claim 11 wherein the user is a system administrator.

13. (Currently Amended) The method of claim 11 wherein ~~the~~ at least one parameter value comprises a network parameter used to make a connection between the mobile device and a network.

14. (Currently Amended) The method of claim 11 wherein ~~the~~ at least one parameter value comprises a communication parameter used to provide wireless communication to the mobile device.

15. (Original) The method of claim 11 wherein transferring the deployment package comprises storing the deployment package on a computer readable medium and inserting the computer-readable medium in the mobile device.

16. (Original) The method of claim 11 wherein transferring the deployment package comprises connecting the mobile device to a computing device through a connection other than a network connection, transferring the deployment package to the computing device and transferring the deployment package from the computing device to the mobile device.

17. (Original) The method of claim 11 wherein transferring

the deployment package comprises connecting the mobile device to a network, having an agent on the mobile device request the deployment package over the network, and transferring the deployment package over the network to the mobile device.
